## MEDIA RELEASE

**New product**  
**Available: April**

### Restaurant quality deep frying

For many, a side order of twice fried fresh chips is a dining-out indulgence – delicious and crispy golden crusts surrounding softly textured potato. The new **Breville Smart Fryer (BDF500)** creates this chef's special at home, among other menu favourites, in less than 20 minutes.

Designed for home cooks seeking deep frying perfection, the Smart Fryer adjusts time and temperature to suit what is cooking with seven pre-set programs – including a custom setting which allows for favourite dishes to be programmed.

The deep fryer's large LCD screen shows time, temperature and a selection of foods. Simply make a selection and this smart appliance will deliver the right temperature at just the right time.

Breville has also built in flexibility to adjust time and temperature for personal preferences, with its intuitive thermostat that quickly heats the oil to the optimum temperature to perfectly cook a variety of sweet and savoury dishes from donuts to calamari and fish.

In addition, the Smart Fryer makes adjustments for fresh or frozen ingredients by compensating for oil cooling when frying foods from frozen, ensuring crunchy results everytime.

**Breville Smart Fryer™ (BDF500) \$169.95 rrp**
